

SC FAIST MEKATRONIC SRL COMMITMENT TO CLIMATE CHANGE AND BUILDING A SUSTAINABLE FUTURE

SC FAIST MEKATRONIC SRL supports the international objective of mitigating climate change by keeping the global temperature at 1.5 degrees Celsius compared to pre-industrialized times.

To reach this target of 1.5 degrees Celsius, SC FAIST MEKATRONIC SRL commits to reducing the carbon footprint resulting from the production process by 50% in 2030 and 100% in 2050, compared to 2018.

We are setting the path for our actions to decarbonize our products and processes as part of our contribution to achieving a carbon neutral economy.

Environment is a key component of our sustainability efforts.
